

Choose to Believe the Evidence!

#2868 0809 20P
VIRTUAL

When we choose to believe the evidence, we are choosing our destiny—eternal living with God the Father and Jesus Christ the Son. We are choosing to believe there is an all-powerful God of the universe, who not only *created* everything, but who also did many things for His people all through Scripture.

We are therefore compelled to pay closer attention to His Words; to ponder the evidence of a Divine Creator; and to walk a little closer to His Son Jesus. John 15:4 “*Abide in me, and I in you;*” as it is the only way to *bear fruit*—stay connected to the Vine and head toward Heaven!

The question to ask; everyday—Where will I be millions of years from now! Asking that, challenges us to think about the endlessness of eternity—that we all will reside in *one* of *two* places—the *worst* of all destinations, or the *best* of all environments! We must—absolutely *must*—have a right *attitude* in our heart toward God; toward His Word; toward all people everywhere, and to treat everyone we meet or have any interaction with in a right and scriptural way! Ephesians 4:32 “*And be [ye] kind to one another, tenderhearted, forgiving one another, even as God in Christ forgave you.*”

A right attitude toward God means we *trust* in *faith* on the Atonement Blood of Christ for all things—and most definitely to ask Him to help

us *forgive* everyone for everything ever done to us. We will all answer to God at some point, and Hebrews 4:13 “*Nothing in all creation is hidden from [Him].*” There is a Creator God to whom we will answer some day—the *evidence* of His existence is *overwhelming!* Psalm 19:1 “*The heavens declare the glory of God; And the firmament shows His handiwork.*”

The evidence of God’s existence is everywhere. Isaiah 45:18 “*For thus says the LORD, Who created the heavens, Who is God, Who formed the earth and made it, Who has established it, Who did not create it in vain, Who formed it to be inhabited: ‘I am the LORD, and there is no other.’*”

No one looks at Mount Rushmore and says: *Wow, erosion is an amazing thing! Look how it formed the likeness of the presidents*—no one says that. A *building* is evidence of a *builder!* The *earth* is evidence of a *Designer.*

We *choose* to *believe* the *evidence*—so we *also* choose to *trust* the living *God* for everything. The wrong *choice* of Adam brought *guilt* on everyone, but if we will *believe* the Gospel message of Christ, then His Atonement Blood takes away that guilt. 1 Corinthians 15:22 “*For as in Adam all die, even so in Christ shall all be made alive*”—if we will *repent, believe* in God, and *trust* in faith on the Atonement Blood of His Son. Luke 13:3 “*Except ye repent, ye shall all likewise perish.*”

A noted astrophysicist says: *The universe and the laws of physics seem to have been specifically designed for us. If any one of about forty physical qualities had more than slightly different values, life as we know it could not exist; Either atoms would not be stable, or they wouldn’t combine into molecules, or the stars wouldn’t form the heavier elements, or the universe would collapse before life could develop* unquote. *Life can arise only from pre-existing life and will perpetuate only its own kind. We choose to believe the evidence!*

Concerning evolution, there is *no evidence* in the fossil record for *macroevolution*—for one species changing to another. There is *no fossil*

evidence of *macroevolution*, but overwhelming evidence of a divine Creator!

We wonder why anyone would *choose* to believe in evolution—which has *no* evidential proof—and which, in fact, the evidence *disproves*. But they will *not believe* by faith in a Divine Creator for whom we *do* have *overwhelming evidence!* The missing link is *still* missing, and will *remain* missing, because the rule holds for humans, as for all other life forms—there are *no* transitional forms.

There is evidence for *microevolution*—adaptation *within* a species—but *macroevolution*—the development of one species into another has *no* evidence to support it. Scientists have found *no* transitional fossils and *no* missing links. An expert in vertebrate fossils said: *Evolution cannot forever be going on somewhere else.* There is just *no evidence* to back up the theory of evolution.

According to the Law of Probability, the odds of *life* arising from *non-life* are beyond the realm of possibility—and that is just for a *single* molecule to come to life. It is impossible to explain the *complexity* of life forms as we know them—which includes the formation of the extremely *detailed* DNA code. Human DNA contains *3-billion* pieces of information—literally tens of thousands of pages worth. All this is *overwhelming evidence* of an intelligent Designer and divine Creator!

The study of molecular biology shows that even a single life cell is incredibly complex. A scientist says: *We have always underestimated cells—which can be viewed as a factory, containing an elaborate network of interlocking assembly lines; each of which is composed of a set of large protein machines—these protein assemblies contain highly coordinated moving parts. All the parts must be in place simultaneously or the cell cannot function. Life is built of these machines—the idea that natural processes could have made a living system, is absurd* unquote.

Although the highly intricate machines in cells often resemble those designed by humans, in many cases the living cells are much more *advanced* than

what humans have been able to create! An evolutionist said of the DNA in cells: *The machine code of the genes is uncannily computer-like.*

The CEO of a major computer firm stated: *DNA is like a computer program, but far, far more advanced than any software we have created.* Researchers believe human DNA could be the *basis* of a new generation of *computers*, because human cells and computers process and store information in a similar way. If the *basic* building block of life is more advanced than humans, then it stands to reason that it requires something far more advanced than humans to design it in the first place.

There are many species in the animal kingdom that proves this intelligent design, and they are *overwhelming evidence* that God is the Creator of every animal and human on earth. If anyone would *examine* the evidence, they would see that *design* comes from a *designer*.

The average person thinks that the ocean sponge is a very simple life form on the evolutionary chart, yet scientists are trying to copy its *sophisticated optical* system. The ocean sponge actually produces *fiber optics* that are better than those from our sophisticated manufacturing methods. The sponge's thin glass fibers are capable of transmitting light better than industrial fiber optic cables used for telecommunication—which are brittle and will crack if bent.

The fibers of the sponge which are grown at cold temperatures, are much more *flexible*, and can even be tied in a *knot* without breaking. By adding traces of sodium to the fibers, the sponge increases their ability to conduct light—something that *cannot* be done in commercial manufacturing. An expert says: *Modern technology cannot yet compete with some of the sophisticated optical systems processed by biological organisms.* The evidence of an All-knowing God is not possible to count!

Macroevolution does *not* explain how *life* could have formed, or how *life could* have evolved from *simple* to *complex* forms, yet most will not

accept the overwhelming evidence of a divine Creator. It is just proof that everyone was born with a *rebellious* heart, and unless there is a *rebirth* to a *new life* that is willing to believe the evidence of a Creator—and to accept *His plan* for this life, the end result of that *rebellion* and *stubbornness* is tragic indeed!

A noted evolutionist, Nobel Prize winner, and Harvard professor, said on the origin of life: *One has only to contemplate the magnitude of this task to concede that the spontaneous generation of a living organism is impossible. Yet here we are as a result, I believe, of spontaneous generation* unquote. This noted scientist acknowledges that spontaneous generation is scientifically *impossible*, yet he *chooses* to believe that *this* is how life began! He is *educated* enough to win a Nobel Prize; and *rebellious* enough to deny the obvious facts.

If he wanted the *truth* he just needed to follow the *evidence*. Psalm 14:1 *“The fool hath said in his heart, There is no God. They are corrupt, they have done abominable works, there is none that doeth good.”* One must first *choose* to believe and then study the *evidence*.

Psalm 14:2 *“The LORD looked down from heaven upon the children of men, to see if there were any that did understand, and seek God. 3 They are all gone aside, they are all together become filthy: there is none that doeth good, no, not one.”*

Someday and soon, we will all stand before the *Judge* of everyone, and we will all give an *account* of how we lived on this earth—why we *did*, or did *not*, accept the obvious *evidence* of an All-powerful God of the universe. Hebrews 4:13 *“There is no creature hidden from His sight, but all things are naked and open to the eyes of Him to whom we must give account.”*

The world is *not* willing to believe and too *rebellious* to accept the clear *evidence* of a divine Creator. Matthew 23:37 *“O Jerusalem, Jerusalem, thou that killest the prophets, and stonest them which are sent unto thee, how often would I have*

gathered thy children together, even as a hen gathereth her chickens under her wings, and ye would not! 38 Behold, your house is left unto you desolate.”

Even if the evidence *points* to a divine Creator, the world as a whole, will not accept it—so their house will be left desolate—by *choice*; and it is the *worst choice* they could ever make. Once we *know* there is a God, we will also *know* that we will *answer* to Him. Despite the evidence, the world will just not go there—they just refuse to believe in God.

The director of the Goddard Institute for Space Studies gives the two options: *Perhaps the appearance of life on earth is a miracle. Scientists are reluctant to accept that view, but their choices are limited. Either life was created on earth by the will of a Being outside the grasp of scientific understanding, or it evolved on our planet spontaneously, through chemical reactions occurring in non-living matter lying on the surface of the planet* unquote. They are the *only* two options.

Either our immensely complex universe came into being by *chance*, or it was *created* by *God*—it is *one* or the *other*. We will have to *choose*—and which one we *do* choose, will decide our destiny—forever! The evidence of God the Creator is simply overwhelming!

When we take our last breath, God will *still* be there—and He loves us so much, that He sent His only begotten Son to pay the price for our *defiant* heart to be converted to a *compliant* one. We *have* to make a choice—and *eternity* hinges on our decision!
